You are offered choice Grafted Camellia Japonicas, one and two year grafts, on four and five year understocks for \$5.00 each. These are extra good values. They are the kinds that you have always wanted as to varieties and quality. They are fresh dug from our nursery rows with a steel form which brings them to you just like getting a cake out of a pan. You dig your hole the same size, and the plant will never know it has been moved. They will live and grow. If you plant now, you will gain a year in growth and blooms. By getting them early, nature will give them care, that you would have to spend many hours on, as the cool weather and winter rains will get them settled and adjusted, so that when the growing season starts, they are ready. Our best customers are the ones that have bought these plants before. These plants have had special care and are carefully balled and burlapped. If you cannot come for these plants, or if you wish to make a gift for a life time, to friends or relatives, we shall be happy to select the best we have for you. They make lovely gifts for any occasion. Crating charges one dollar each. Weight 50 lbs. each.

15 to 36 in. High

Set out Camellias with solid earth under them, so they will not settle deeper after you plant them. Make it loose and rich around them NOT UNDER THEM. This is valuable information.
